SHOAIB KHAN

FULLSTACK DEVELOPER

ABOUT ME

I am a passionate and results-oriented full-stack web developer currently pursuing the HDSE program at APTECH. With hands-on experience in both frontend and backend technologies, I have successfully developed and deployed multiple live projects, ranging from dynamic web applications to responsive user interfaces. My expertise includes HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL, along with practical use of Git and GitHub for version control. I take pride in continuously improving my skills and staying aligned with modern web development trends. All of my work, including 6 live projects, is professionally showcased on my personal portfolio website.

EXPERIENCE

- Developed and deployed multiple full-stack web projects, several of which are live and accessible via my portfolio website.
- Built dynamic websites with complete frontend and backend integration using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL.
- Focused on clean UI/UX design and implemented features like form handling, login systems, and interactive elements.
- Practiced real-world development workflows, including the use of Git and GitHub for version control.
- Collaborated on academic and independent projects, enhancing skills in both individual problem-solving and teamwork.
- Created a fully responsive portfolio website to present all major projects in one place.
